ADITUM ALTERNATIVE INCOME FUND COMMENTARY

The fund performed well over the month with most positions contributing to performance, although returns by source were more varied than in previous months. Our European debt position added solid performance, and the fund continued to benefit from GBP strength against the US Dollar. Emerging market debt and trade finance delivered returns which were more in line with longer term averages, compared to the previous few month's performance. This said, our positions in strategic debt funds proved to be weaker, predominantly due to their exposure to the US, Japanese and Australian government debt. These were affected by the testimony of the Federal Reserve Chairman, Jerome Powell, which pushed longer dated yields back up mid month.

We sold our lower yielding cash position over the month and will look to deploy fresh capital in mid September. At the time of publishing, risk aversion has increased slightly, and this may create more attractive pockets to build positions further. Alongside this opportunistic trading, we are reviewing three new holdings which will diversify risk further. These will be more strategic in nature as long-term positions for the portfolio.

*This indicative benchmark is calculated by Aditum Investment Management Limited using the USD 1M LIBOR rate published by ICE, assuming ACT/360 interest rate calculation, full notional invested and reinvested each month as of the last rate published the previous month.
