SHARE CLASS	ISIN	NAV*
C ACC	KYG3933U1444	-
C INC	KYG3933U1519	1002.4792

## INVESTMENT OBJECTIVES

The Global Fixed Income Plus Fund\* ("GFIPF") is an actively managed fixed income fund that aims to generate a regular stream of fixed income returns and cash distributions through investments in fixed income securities (and any other asset class that may be appropriate from time to time) to seek to achieve an attractive risk-adjusted return. This is a performance target and is not guaranteed.

\*Marketing name for the Fund's full legal name: Global Fixed Income Plus Fund 2028

## PERFORMANCE (%)

	1M	3M	6M	1YR	S.I.*	Dividends SI*
GFIPF	0.25	-	-	-	0.25	-

\*The performance is calculated from C (Inc) USD share class since inception 4 November 2024.

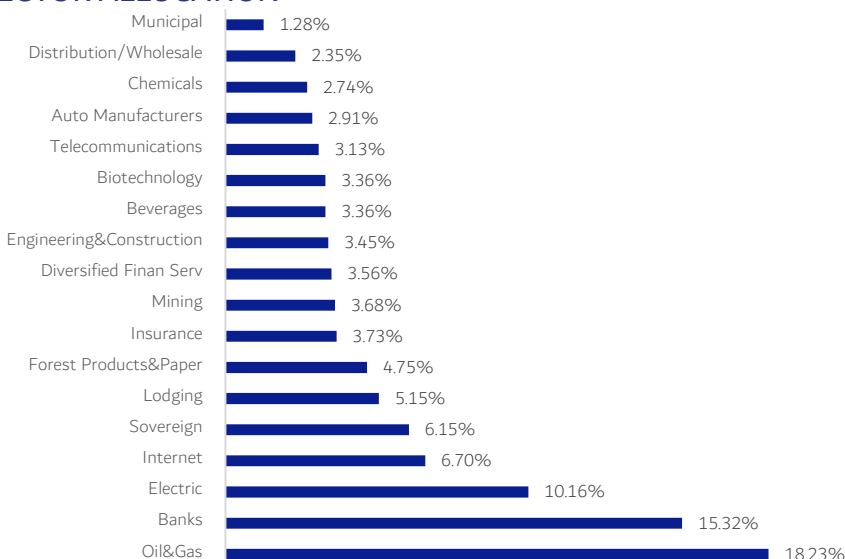

Past performance is not an indicator or guarantee of future performance. The value of shares in the fund and income received from it can go down as well as up, and investors may not get back the full amount invested.

Performance may also be affected by currency fluctuations of the underlying holdings. It is the Directors' intention to leverage the capital of the Fund at levels expected to represent around a 67% maximum loan-to-value ("LTV") ratio (approximately 2x base equity of the Fund), subject to the availability of financing and the discretion of the Directors (on the advice of the Investment Manager) to amend the LTV target as they deem appropriate. The Fund intends to source leverage by borrowing in different currencies, which will expose the fund to currency risk.

Aditum Investment Management Limited is a company established in the DIFC pursuant to the DIFC Companies Law with registration number CL2833.

Investing in this fund involves a significant degree of risk due to the use of leverage. Leverage, or borrowing to invest, can amplify both gains and losses, which makes leveraged investments suitable only for investors who fully understand and are prepared to accept the potential volatility and loss. Key Risks to Consider will include market risk, increased volatility, loss of principal, interest rate risk and financial costs (leverage involves borrowing costs that may increase due to rising interest rates. These costs can erode returns and increase the risk of losses, particularly in prolonged periods of higher interest rates), liquidity risk, margin calls and forced liquidation, regulatory and tax implications. Investors should seek independent tax advice to understand regulatory and tax implications fully. Leveraged investments are generally suitable for experienced investors who are financially capable of managing the risks associated with significant losses and who have a high-risk tolerance. This fund is not recommended for conservative investors or those with a short-term investment horizon.
