## RISK INDICATOR

## INVESTMENT OBJECTIVES

The Short Term Liquid Securities Fund GBP ("STLSF") is an actively managed fund that aims to provide liquidity and an attractive risk-adjusted rate of income relative to short-term interest rates, to the extent consistent with the preservation of capital. The Fund will invest in high quality, short-term fixed income securities and money market instruments, including government, quasi government and corporates issued primarily denominated in GBP or hedged back to GBP, including but not limited to bank certificate of deposits, commercial paper, corporate and sovereign variable and fixed rate bonds and floating rate notes.

## RISK CONSIDERATIONS

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 1 out of 7, which is the lowest risk class. This rates the potential losses from future performance at a very low level, and poor market conditions are very unlikely to impact our capacity to pay you. Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above. This product does not include any protection from future market performance so you could lose some or all of your investment. The sub-fund is also exposed to the following materially relevant risks that are not included in the summary risk indicator: liquidity risk, counterparty risk, custody risk, operational risk, and risks arising from the use of derivatives.
